

MOHAMMED KHANFAR

PROFESSIONAL SUMMARY

Cybersecurity professional with hands-on experience in networking, Linux system administration, and security fundamentals including threat modeling and risk management. Proficient in Python, C/C++, and Bash scripting, with experience building and managing virtual lab environments using VMware. Recognized for reliability and performance in fast-paced environments, with strong problem-solving and troubleshooting abilities. Seeking to apply technical and analytical skills in a cybersecurity or IT role to support secure and efficient systems.

Skills & Tools

- Python, C/C++, and Bash Scripting
- Linux System Administration (CLI, permissions, processes)
- Windows OS Security Fundamentals
- TCP/IP Networking (DNS, DHCP, Routing & Switching)
- Network Troubleshooting
- VMware Virtualization & Lab Environments
- Cybersecurity Fundamentals (CIA Triad, Threat Modeling)
- Risk Management & Basic Incident Detection
- Firewalls, VPNs, and IDS/IPS Concepts
- Cryptography Fundamentals
- AWS & Oracle Cloud Basics
- GIT Version Control
- TCP Dump
- VMware
- Automation & Scripting for System Tasks
- Log Analysis
- Problem-Solving & Troubleshooting
- SEO Optimization
- Aminos Chat Bot
- WordPress (Website Creation)
- HTML
- Training Chat Bots
- Wireshark
- Metasploit
- N8N

WORK HISTORY

Merchandiser
Shoppers Drug Mart — Mississauga, ON. 2020-Present
Merchandiser:

- Managed inventory, restocking, and shipment organization in a fast-paced retail environment
- Operated equipment (pump trucks) to move and organize stock efficiently
- Opened and closed store independently while maintaining operational standards
- Prepared loss prevention and store reports with high attention to detail
- Delivered customer service including handling inquiries and passport photo services
- Recognized as Employee of the Month (9 times) for reliability and performance
- Maintained organization, accuracy, and efficiency during high-volume operations

Web Development & AI Chatbot Project with Security Implementation

Simcoe Cosmetic Clinic — Barrie, ON March 2026 – May 2026

- Designed and developed a user-friendly, SEO-optimized website using WordPress and Dream Host
- Utilized text retrieval and content structuring techniques to improve website performance and usability
- Collaborated with team members through regular meetings to track progress and refine strategy
- Demonstrated project outcomes and presented solutions to team members and stakeholders
- Delivered a fully functional website along with a maintenance guide for long-term use
- Implemented basic website security measures including HTTPS configuration, secure authentication practices, and protection against common web vulnerabilities
- Designed and configured an AI chatbot using Aminos to automate customer interactions and improve user engagement
- Developed and optimized chatbot conversation flows to handle inquiries, guide users, and support customer acquisition
- Integrated chatbot functionality into the website to enhance user experience and response efficiency

Volunteer

Big Brothers Big Sisters of Peel Region

2015–2019

- Assisted in organizing community activities and supporting newcomer programs
- Contributed to engagement initiatives and teamwork-based environments

EDUCATION

Bachelor of Information Sciences (Cybersecurity) (*In Progress*)

Sheridan College — Brampton, ON / Expected Graduation: 2027/2028

CERTIFICATIONS

- Microsoft Cybersecurity Analyst (9 Course) — Microsoft (June 2026)
- Microsoft Azure Security Specialization (5 Course) — Microsoft (May 2026)
- IBM Generative AI For Cybersecurity Professionals (3 Course) — IBM (May 2026)
- 2026 Cyber Crime Academy (4 Weeks) — Peel Regional Police (Apr 2026)
- ThinkCloudly Cybersecurity Bootcamp (5 Day) — ThinkCloudly (June 2026)
- ThinkCloudly IT Auditing & GRC Bootcamp (5 Day) — ThinkCloudly (July 2026)
- Wireshark for Security: Detect Network Anomalies — Coursera (May 2026)
- Metasploit: Ethical Penetration Testing — Coursera (May 2026)
- Analyze Network Traffic with TCPDump — Coursera (May 2026)
- Introduction to Bash Shell Scripting — Coursera (May 2026)
- Microsoft Security, Compliance & Identity Fundamentals — Microsoft (*via Whizlabs*) (May 2026)
- Foundations of Cybersecurity — Google (May 2026)
- Dive Into Kubernetes – Containers, Dockers, & Kubernetes — DiveInto (May 2026)

PROJECTS

Simcoe Cosmetic Clinic Digital Presence Enhancement — Rüpen (2026)

- Developed and deployed a secure WordPress website with HTTPS and authentication best practices
- Built and trained an AI chatbot using Aminos to automate client interactions
- Designed and implemented an automation workflow using n8n to capture and process user data
- Applied basic security practices to protect against common web vulnerabilities
- Delivered full project including deployment, testing, and documentation
